CAREER OBJECTIVE

Graduate of computer science with experience working with web technologies. Earnestly desiring a role where I can grow and learn from experienced team members while drawing on project experience I have successfully executed.

EDUCATION

BSc. Computer Science
2020 – 2023
Protestant University of West Africa

WORK EXPERIENCE

KENROW DIGITAL MARKETING – SOFTWARE ENGINEER (Part time)

- Built software applications, with a focus on building the Kenrow Shop's merchant management application as a start.
- I had the pleasure of contributing to the brainstorming and execution of fresh, innovative features that are custom-made for the merchant management application
- Worked hand-in-hand with diverse teams, ensuring we consistently deliver top-notch software solutions

SACULIET NIGERIA ENTERPRISES

I developed a portal specifically tailored for the Driving School Arm of the company. This portal enables organizations to easily verify the certificates of the students from the driving school. Some key features I implemented include:

- A user-friendly page allowing organizations to submit student verification requests with email verification for added security.
- A comprehensive dashboard for the driving school administration to efficiently manage requests, students, and organizations
- Automated email notifications to keep the school informed at every step: from receiving a request submission to granting it, and notifying students when their certificate is verified by an organization

Additionally, I designed a captivating landing page and a visually appealing gallery page displaying images and pictures of the driving school, enhancing its online presence and engaging potential students.

CHRIST LIBERTY ASSEMBLY

I built a website for Christ Liberty Assembly, a beloved church, which features key sections including:

- A page for displaying sermons and a gallery page that displays images of the church.
- A page to display articles and a page for each article. The link to each article can be shared on social media platforms or the copied to clipboard.
- A search functionality to filter out articles by title and sermons by title or preacher.

SKILLS

- HTML/CSS
- Next.js
- Javascript (React)
- WordPress (CMS)
- SQL
- REST APIs
- Tailwind
- Bootstrap
- SEO
- GIT / Github / Gitlab
- PHP
- Database Design
- Data Structure and Algorithm
- Responsive Design
